Subject: GIF of Joe Kittinger's jump at 100,000 feet?
To: ham-space@ucsd.edu

Is there a GIF easily available somewhere with the photograph of
Capt Joe Kittinger's parachute jump from a balloon at 100,000 feet?

He was testing a survival/escape suit for astronauts to use during
launch in 1960. The view is through the door of the balloon pod (?)
of his back as he is falling about 10 feet below the balloon.
Way down below, you can see the cloud ceiling (?). It is an awesome
view of a man against the elements.

Thanks for any leads.

To: ham-space@ucsd.edu

Is the InstantTrack V1.0 software by Franklin Antonio
now a free distributable software package? I thought
it was shareware. I picked up the QRZ cdrom and found
it in the misc/dl_files directory as it_track.exe

Subject: Satellite Tracking Software - Best?
To: ham-space@ucsd.edu

Fellow Netters:

I'm sure this is probably a FAQ on this bb, however I'll keep
this short:

I'd like opinions/suggestions about what is the "best"
satellite tracking program [DOS compatible] available today, BEST
in terms of ease of use, accuracy, and availability for IBM clone
use (memory requirements?). I would like to try some satellite work
(at least Mode A on RS-10 to start) to see how it works and if I
like it, however I am in need of a good tracking program for obvious
reasons. I have all necessary equipment for a Mode A station with
the exception of the software.

Your comments either by e-mail to s1.rsw@isumvs.iastate.edu
or posted on the bb would be helpful (sources of programs?).

Thanks in advance, and 73,

Rob Wallace, WA2SP0
Ames, Iowa
